RUS 004 - Keep Straight Ahead

RUS 005 - Turn Right

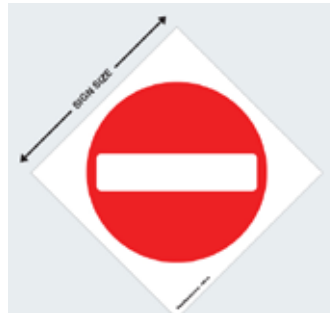

RUS 006 - Turn Left

RUS 014 - No Overtaking

RUS 038 - No Pedestrians

RUS 050 - No Entry

RUS 055 - No Cycles

RUS 056 - No Horses

W 150 - Horses

W 151 - Cattle or Farm Animals

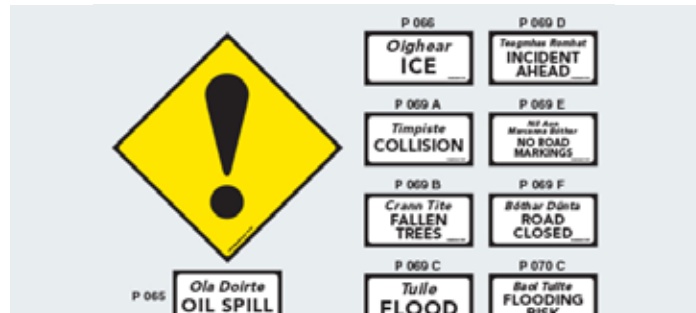

W 152 - Sheep

W 168 - Tractors

W 170 - Hazard

This hazard sign should be accompanied by a relevant supplementary plate

P 001 - Distance  
(Available with various distances)

P 002 - Length  
(Available with various lengths)

P 003L - Direction Left  
(Available with various distances)

P 003R - Direction Right  
(Available with various distances)

P 004L - Direction  
& Distance Left

P 004R - Direction  
& Distance Right

P 010 - End

P 011 - Cautionary Speed  
(Available with various speeds)

P 065 - Oil Spill

P 066 - Ice

P 069 A - Collision

P 069 B - Fallen Trees

P 069 C - Fallen Trees

P 069 D - Fallen Trees

P 069 E - No Markings

P 069 F - Road Closed

P 070 - Flooding Risk

P 080 - Slow

P 081 - Concealed Entrance

P 082 - Road Marking

P 083 - Use Shoulder

P 084 - End of Shoulder

P 085 - Unfinished Surface

P 086 - On Slip Road

- NRA compliant
- Produced using PEG (Prismatic Engineering Grade) class RA1 reflective background with printed graphics
- Very high reflective values for improved long distance visibility at night
- Available on 5mm corriboard, 9mm corriboard, rigid black pvc or aluminium composite

**Don't see the sign you need?** Ask us and we will produce it for you.

**Please Note:** Roadworks signs are typically placed in environments where they are vulnerable to damage and may have relatively shorter lifespans than permanently fixed signs. With this in mind, and in order to offer the most affordable prices, we typically produce our roadworks signs by printing onto the reflective film and do not use an over laminate. As the graphics are not laminated they are vulnerable to possible scratching and fading over time, however we can produce these signs with more durable, long term print upon request.
